

Giulia Manno Lima

Senior Product Designer

mannogiu@gmail.com · +55 (91) 984349050 · [LinkedIn](#) · [Portfolio](#) · Florianópolis/SC, Brazil

Summary

Senior Product Designer with 4+ years of experience designing complex digital products across B2B and platform contexts. Specializes in design systems, accessibility, and end-to-end product discovery — from early research and problem framing through delivery and systemization. Known for building strong cross-functional partnerships with engineering and product, establishing design foundations from scratch, and translating ambiguous requirements into intuitive, scalable experiences.

Professional Experience

Fetchly Labs - Product Designer & Strategist

June/2025 - present

- Led product discovery and UX strategy across multiple client engagements, shaping product direction from research insights through design recommendations and prototypes.
- Conduct qualitative research, stakeholder interviews, and alignment workshops to translate business goals into clearly defined problem statements and design opportunities.
- Partner closely with design and delivery teams to ensure strategic and experiential consistency across the product lifecycle.

Norus - Product Designer

March/2024 - June/2025

- Designed and implemented a scalable design system from the ground up, establishing component standards and patterns that improved consistency across the product and reduced design-to-dev handoff friction.
- Served as the primary design partner in a cross-functional squad, driving decisions across discovery, ideation, and delivery.
- Introduced new design workflows and rituals — including critique sessions and documentation practices — that strengthened collaboration between design, engineering, and product and helped build a sustainable design culture.
- Championed accessibility and usability best practices across all product initiatives, ensuring alignment with WCAG standards.

LabSEC - Product Designer

Part-time; July 2023 - December 2023

- Led the full redesign of a legacy platform, modernizing the interface and significantly improving usability and accessibility compliance.
- Created a Bootstrap-based pattern library that reduced implementation inconsistencies and streamlined developer handoff.
- Worked in close collaboration with developers throughout implementation to ensure design fidelity and technical feasibility.

SiDi - UX/UI Designer

Part-time; August 2022 - December 2023

- Contributed to the evolution of an internal product for a major global technology client in the consumer electronics sector, improving key user flows and overall usability across multiple regions and user profiles.
- Participated in requirements-gathering sessions with international stakeholders, translating complex needs into concrete design solutions.
- Delivered UX improvements that supported broader platform goals across a geographically diverse user base.

EquipeDigital.com - Social Media & Web Designer

Part-time; May/2021 - March/2022

- Designed and prototyped responsive websites and landing pages; supported brand communication through digital visual assets.
-

Education

Bachelor's degree in Design

Federal University of Santa Catarina

March/2019 - December/2023

Other Experiences

Scholarship for scientific initiation (PIBIC-CAPES)

Universidade Federal de Santa Catarina

2021 - 2022

Studied accessibility best practices for graphic-experiential Design.

Volunteer mentor at Technovation Girls

February/2024 - May/2024

Mentored young women participating in a global tech competition, developing leadership and coaching skills in a cross-cultural environment.

Volunteer mentor at PAQ - Prototipando a Quebrada

May/2025 - August/2025

Provided design mentorship to teens and young adults in a local social inclusion program focused on technology access and empowerment.
